

713 Cylinder Oil

DESCRIPTION:

Cylinder Oil 713 is a cylinder lubricant and worm gear lubricant. Along with high VI, foam resistance and rust protection properties, it gives excellent lubricity and wetability characteristics. Cylinder Oil 713 is compounded with stable fatty additives in specially selected heat resistant base oils. In addition to possessing the wetability required for effective steam cylinder lubrication, it separates readily from steam condensate. It contains no EP additives.

**TYPICAL
SPECIFICATIONS:**

Test Description	Method	Results
Viscosity, CST @ 40C	D445	220
Viscosity Index	D2270	144
Flash, COC, F	D92	550
Pour, C	D97	-40
AGMA		5S
