

748

Syn-O-Gen

Synthetic Industrial Chain Lubricant

DESCRIPTION:

Syn-O-Gen No. 748 is an extreme-pressure, synthetic hydrocarbon, industrial chain lubricant designed to meet and exceed all industrial lubricant specifications and provide superior protection and long life in a wide range of chain applications.

COMPOSITION:

Syn-O-Gen Synthetic Industrial Chain Lubricant No. 748 contains a sulfur-phosphorus chemistry, high performance, extreme pressure additive package in addition to special demulsifiers, rust, oxidation, and corrosion inhibitors in a polyalphaolefin (PAO) basestock.

PERFORMANCE CHARACTERISTICS:

Meets and exceeds the following industrial performance requirements:

- US Steel 224
- AGMA 250.04
- DIN 51517 Part 3
- David Brown ET 33/80
- Available in AGMA Viscosity Grades EP 2 thru EP 7

BENEFITS:

- Extra-high load carrying ability
- Reduced wear in critical applications
- Prevents rust
- Will not mix with water
- Non-corrosive to yellow metals
- Superior oxidation stability
- Extends chain life
- Extends service intervals
- Reduces power consumption
- High temperature resistant
