Richard came into our facility and gave a compelling demonstration on the Primrose 327 tube grease. We purchased a 30 tube case and distributed it among our road technicians for them to try at some local chicken processing plants to see if the grease would hold up in the harsh environments. It has proven to be a great grease and saved us a lot of down time in repairs. This is now the only tube grease we use in our facility. I now purchase 300 tubes at a time.
