

Eight months ago we begin using the Armor Plate grease from Primrose we have experienced great results. This product has been proven to be an outstanding addition to our preventive maintenance program. We have not had a drive line u-joint, spring hangars, top door bushing nor, king pin failure. We are now using it to service our Roll Off and Front Load Truck Fleet as well as our smaller pickup trucks. The success we have had with this product has allowed us to better service our fleet and cut grease consumption by 45%.

I would highly recommend this product to anybody running any kind of truck fleet. Although the product may not be inexpensive it has proven to be the best and well worth every dollar.

Sincerely,

Norris C. Owens
