

PRIMROSE PLUS

204

Primrose Plus

Saw Oil

DESCRIPTION:

The need for superior lubricants is where Primrose has created a niche for over one hundred years.

Long saw life cannot be achieved without the use of specially formulated oils. Primrose has over engineered Primrose Plus Saw Oil No. 204 specifically to prolong the life of saw blades; thus, achieving longer blade life and longer operation times before maintenance or high replacement costs of saw blades is needed.

COMPOSITION:

Primrose Plus Saw Oil is a petroleum based lubricant containing the following:

- | | |
|---------------------------------|----------------------|
| Mild Extreme Pressure Additives | Anti-Foam Agents |
| Anti-Friction Additives | Demulsifiers |
| Adhesive/Cohesive Additives | Oxidation Inhibitors |
| Dispersant Additives | Corrosion Inhibitors |
| Rust Inhibitors | |

PERFORMANCE CHARACTERISTICS:

Prolonging blade life is where Primrose Plus Saw Oil No. 204 excels by not wearing down as fast as saw blades that are lubricated with commodity brand saw oils. Primrose's Saw Oil resists excessive sling off and fights both corrosion and rusting of saw blades.

- Non-misting - reduces oil consumption, eliminates fog and mist keeping scanners clean and functioning properly. Dramatically reduces and/or eliminates the need for cooling water.
- Non-staining - maintains quality of wood
- Eliminates pitch buildup - cleaner saws, guides and wheels
- Extends saw, guide and wheel life

USES:

Excellent for use in any saw requiring the need for lubrication that leads to less down time and more production time.

APPLICATIONS:

Can be used in all machines requiring far superior lubrication and blade life of saws.

TYPICAL SPECIFICATIONS:

	ISO VG 22
API Gravity @ 60°F	34
Flash, COC °C	200
Viscosity, SUS @ 100°F	110
Viscosity Index	110
Pour Point, °F	0
